

Airport Influence Area for Marine Corps Air Station (MCAS) Miramar

The Airport Influence Area for MCAS Miramar affects the (Community Name) Community. The Airport Influence Area is comprised of the noise contours, safety zones, airspace protection surfaces, and overflight areas for MCAS Miramar and serves as the planning boundaries for the Airport Land Use Compatibility Plan, as shown in (Figure/Map Number/Name). The Airport Land Use Commission for San Diego County adopted the Airport Land Use Compatibility Plan to establish land use compatibility policies and development criteria for new development within an airport influence area to protect the airport from incompatible land uses and provide the City with development criteria that will allow for the orderly growth of the area surrounding the airport. The policies and criteria contained in the Airport Land Use Compatibility Plan are addressed in the General Plan (Land Use and Community Planning Element and Noise Element) and implemented by the supplemental development regulations in the Airport Land Use Compatibility Overlay Zone of the San Diego Municipal Code. Planning efforts need to address airport land use compatibility issues consistent with airport land use compatibility policies and regulations mentioned above.
